Creativity and Innovation

There is an exciting shift happening in education as we are returning to creative, hands-on approaches to learning. In this course, participants will learn and understand in a hands-on, collaborative learning environment how to successfully implement ways to infuse creativity and innovation in the classroom. Participants will explore STEAM (science, technology, engineering, arts, and math) education and the Maker Movement as pathways to provide meaningful learning opportunities in schools.

Brandman University

DEVELOP CREATIVITY AND INNOVATION IN YOUR CLASSROOM

Should you take this course?

- Build knowledge of STEAM learning and Maker Education
- Engage in FUN, hands-on practices to enhance learning that can apply at all levels and subject areas
- Explore a variety of resources to develop and apply teaching strategies to integrate STEAM and Maker learning into the curriculum

About the Instructor, Dr. Jacie Maslyk -

Passionate about teaching and learning, Jacie has served in public education for 20 years as a classroom teacher, reading specialist, elementary school principal, and Director of Elementary Education. An early implementer of STEAM and Making in schools, she currently serves as the Assistant Superintendent in the Hopewell Area School District and leads the movement for creativity and innovation in Beaver County with the establishment of the Innovation & Learning Consortium. She is also the author of *STEAM Makers: Fostering Creating and Innovation in the Elementary Classroom* from Corwin Press.
